Vehicle Incentive Application 2017 Info page 2 of 3

Brief Description of the Project

The program will award data collection incentives for converted and OEM vehicles. Data collected includes number of units deployed in New York, fuel consumption, fueling methods, and operational characteristics.

Statement of Project

Propane vehicle data collection incentives will be available to private fleets (businesses). The project will award data collection incentive for both converted and OEM vehicles. Data collected includes a refueling log for each vehicle. These may be bi-fuel or dedicated systems. Conversion kits must be EPA-approved and/or CARB-certified.

Up to \$5,000 will be awarded for OEM vehicles. Up to \$5,000 will be awarded for the incremental cost of the conversion to propane autogas vehicles. There will be a cap of \$10,000 per fleet. New York PERC will use the Nexight Group for all data collection tools and post incentive data collection (initial survey, final survey, data log).

Budget and Statement of Costs

2017 Propane Vehicle Incentives
\$5,000 per vehicle

Cost Benefit Analysis

This project will not only increase propane consumption in New York, but also provide the opportunity to test the new technology in the field and collect valuable data. There are different platforms coming into the market each year that needed to be tested.

Evaluation Statement

Each incentive recipient will be required to complete a pre-incentive and post-incentive Data Collection Questionnaire for each vehicle placed into use. This survey collects units deployed and performance data including fuel consumption, hours of operation, maintenance records, performance data, and the drivers' overall impressions and experience. This information will be submitted to PERC with the final report.

New York PERC will use the Nexight Group for all data collection tools and post-incentive data collection (initial survey, final survey, data log).

NEW YORK PROPANE GAS ASSOCIATION VEHICLE REBATE PROGRAM GUIDELINES FOR 2017

WHO AND WHAT IS ELIGIBLE?

Rebates are available to NYS residents who purchase a new propane vehicle or convert an existing vehicle with a propane system. Applicants must be a New York State resident and the vehicle registered in New York State. The rebate is available to one vehicle per fleet.

WHAT VEHICLES ARE ELIGIBLE?

Any vehicle or retrofit system that is approved by the U.S. Environmental Protection Agency and or is CARB certified and is registered and operated and complies with all applicable regulatory standards in the state of New York is eligible for a \$5,000 incentive payment. The funds may be used for the incremental cost of a propane vehicle versus gasoline or diesel vehicle only.

WHAT DO I HAVE TO DO IN EXCHANGE FOR THE REBATE FUNDS?

The rebate recipient agrees to submit an initial survey when the application is submitted.

A data log and a final survey must be submitted 12 months from the purchase date. The data log tracks a monthly report of miles, gallons used, and vehicle performance characteristics.

All three of the above must be submitted in order to participate in the program.

The data collected will be used to produce a document which will assist the propane industry and vehicle manufacturers with necessary data needed to evaluate vehicle performance on propane vs. gasoline, to make improvements to the vehicles and to sell the use of propane as an alternative motor fuel. The New York Propane Gas Association will supply a reasonably sized Association sponsored decal which must be displayed on three (3) sides of the awarded vehicle.

[]The rebate recipient will allow signage and give permission to use their image and or name for future media purposes.

WHEN DOES THE PROGRAM BEGIN AND END?

The rebate program begins and January 1, 2017, and ends December 31, 2017, or when program funds are exhausted. The payment of a rebate under the program or this agreement is subject to available funds. If available funds run out during the program year, NYPGA may elect to carry over applications until the next program year if available. All eligible purchases or retrofit installations must occur during the rebate program.

Rebate recipients will be paid \$5,000.00 after the application, initial survey; vehicle purchase and proof of payment are approved by NYPGA. Applicants agree to complete the final survey and completed data collection as soon as possible.

Completed and approved applications should have a rebate check issued within 60-90 days after the participant's criteria is met, subject to available funds. No applicant has the right or other entitlement to receive rebates under the program or this agreement. A completed application does not bind NYPGA to approve or pay a rebate to any applicant.

An applicant or propane marketer may be suspended from, or declared ineligible to participate in the rebate program if NYPGA determines that the applicant or propane marketer has submitted false information or otherwise violated terms and conditions. Within 30 days after NYPGA suspends or declares an applicant or propane marketer ineligible, the applicant or propane marketer may appeal the action by submitting the appeal in writing to NYPGA. Actions taken by NYPGA with respect to the appeal will be final. An applicant or propane marketer who submits false information pertinent to a rebate may be subject to criminal and civil penalties including U.S. Mail fraud.

Applicant agrees that NYPGA, its agents, or propane marketers will not be liable if a person suffers any personal or bodily injury, death, or property damage as a result of propane vehicles or retrofits installed on vehicles. Applicant agrees that this release of liability is binding on their personal representatives, successors, heirs, assigns, and next of kin.
